Crafting Beauty from Nature's Canvas

Unleashing the full
potential of your designs
with our advanced
natural stone capabilities

About Us

A brand that embodies the ever-evolving and transformative nature of natural stone. We are inspired by the endless possibilities that natural stone can bring to people's lives, from its unique natural variations to its formidable strength and durability.

Stable sourcing from 250 quarries

Seamless processing in 4 factories

Export over 33,00,000 sq.m per year

Impacted lives of over 10,000 people

Largest manufacturer of sandstone and limestone products

Embracing the Beauty of Nature's Craftsmanship

We believe that natural stone is a manifestation of nature's craftsmanship. Each piece of stone is a one-of-a-kind work of art, crafted by the earth over countless eons. We take pride in bringing this natural beauty to your living spaces, whether it's for a residential or commercial application.

It's in the eye of the beholder to determine what's most desirable in application to add function and aesthetic appeal for homes and commercial application.

Get inspired by the inherent individuality of stone and use it with your creative imagination to make spaces come alive.

Looking to create a strong statement and individual style with your next creation?

Enter the realm of natural stones with confidence, and let us help you create an atmosphere of subtle luxury and enhanced functionality.

Advice on Feasibility

Share your project details with our feasibility experts, so we can help you assess the usage of natural stones in your project. **Whether it is an initial plan or a 3D rendering of the project, we work with you to choose the right stone and understand any special needs.** Our top of the line machines and equipment can cut any shape and size to deliver to your vision. After evaluating the feasibility of the project, we next determine the quantity required, provide cost estimates and present samples of our natural stone products.

Perennial Availability

With access to over 250 quarries in North and South India, you can be sure of year-round availability. **Our spacious stockyards and expansive shop floor capacity, allows for perennial availability of our stones, even for large orders.** Our 4 state-of-the-art factories are located close to the quarries for seamless processing.

Design to Exact Specs

In the case of bespoke products created in natural stone, the design nuances need to be handled with expertise. **Our team is well versed with reading 3D designs and matching each part of the creation with the original specs, not leaving any room for error.** We ensure the natural stone is cut, finished and performs as per the design criteria of the designer.

Superlative Design Capability

Creating customised sizes, designs and shapes of natural stone with dedicated sophisticated equipment are the hallmark of our offering. Familiarise us with your design vision and our experts will help you bring it to life utilising the very latest technology or traditional craftsmanship.

Uncompromised Delivery Timelines

With quarrying and processing under one management, you are assured of a seamless supply chain, with no adverse impact to your delivery timelines. Our ability to stock large amounts and surplus capacity ensures seamless supply. Longstanding relationships with logistics partners and end-to-end in-house processing allows us to mobilise large resources in no time.

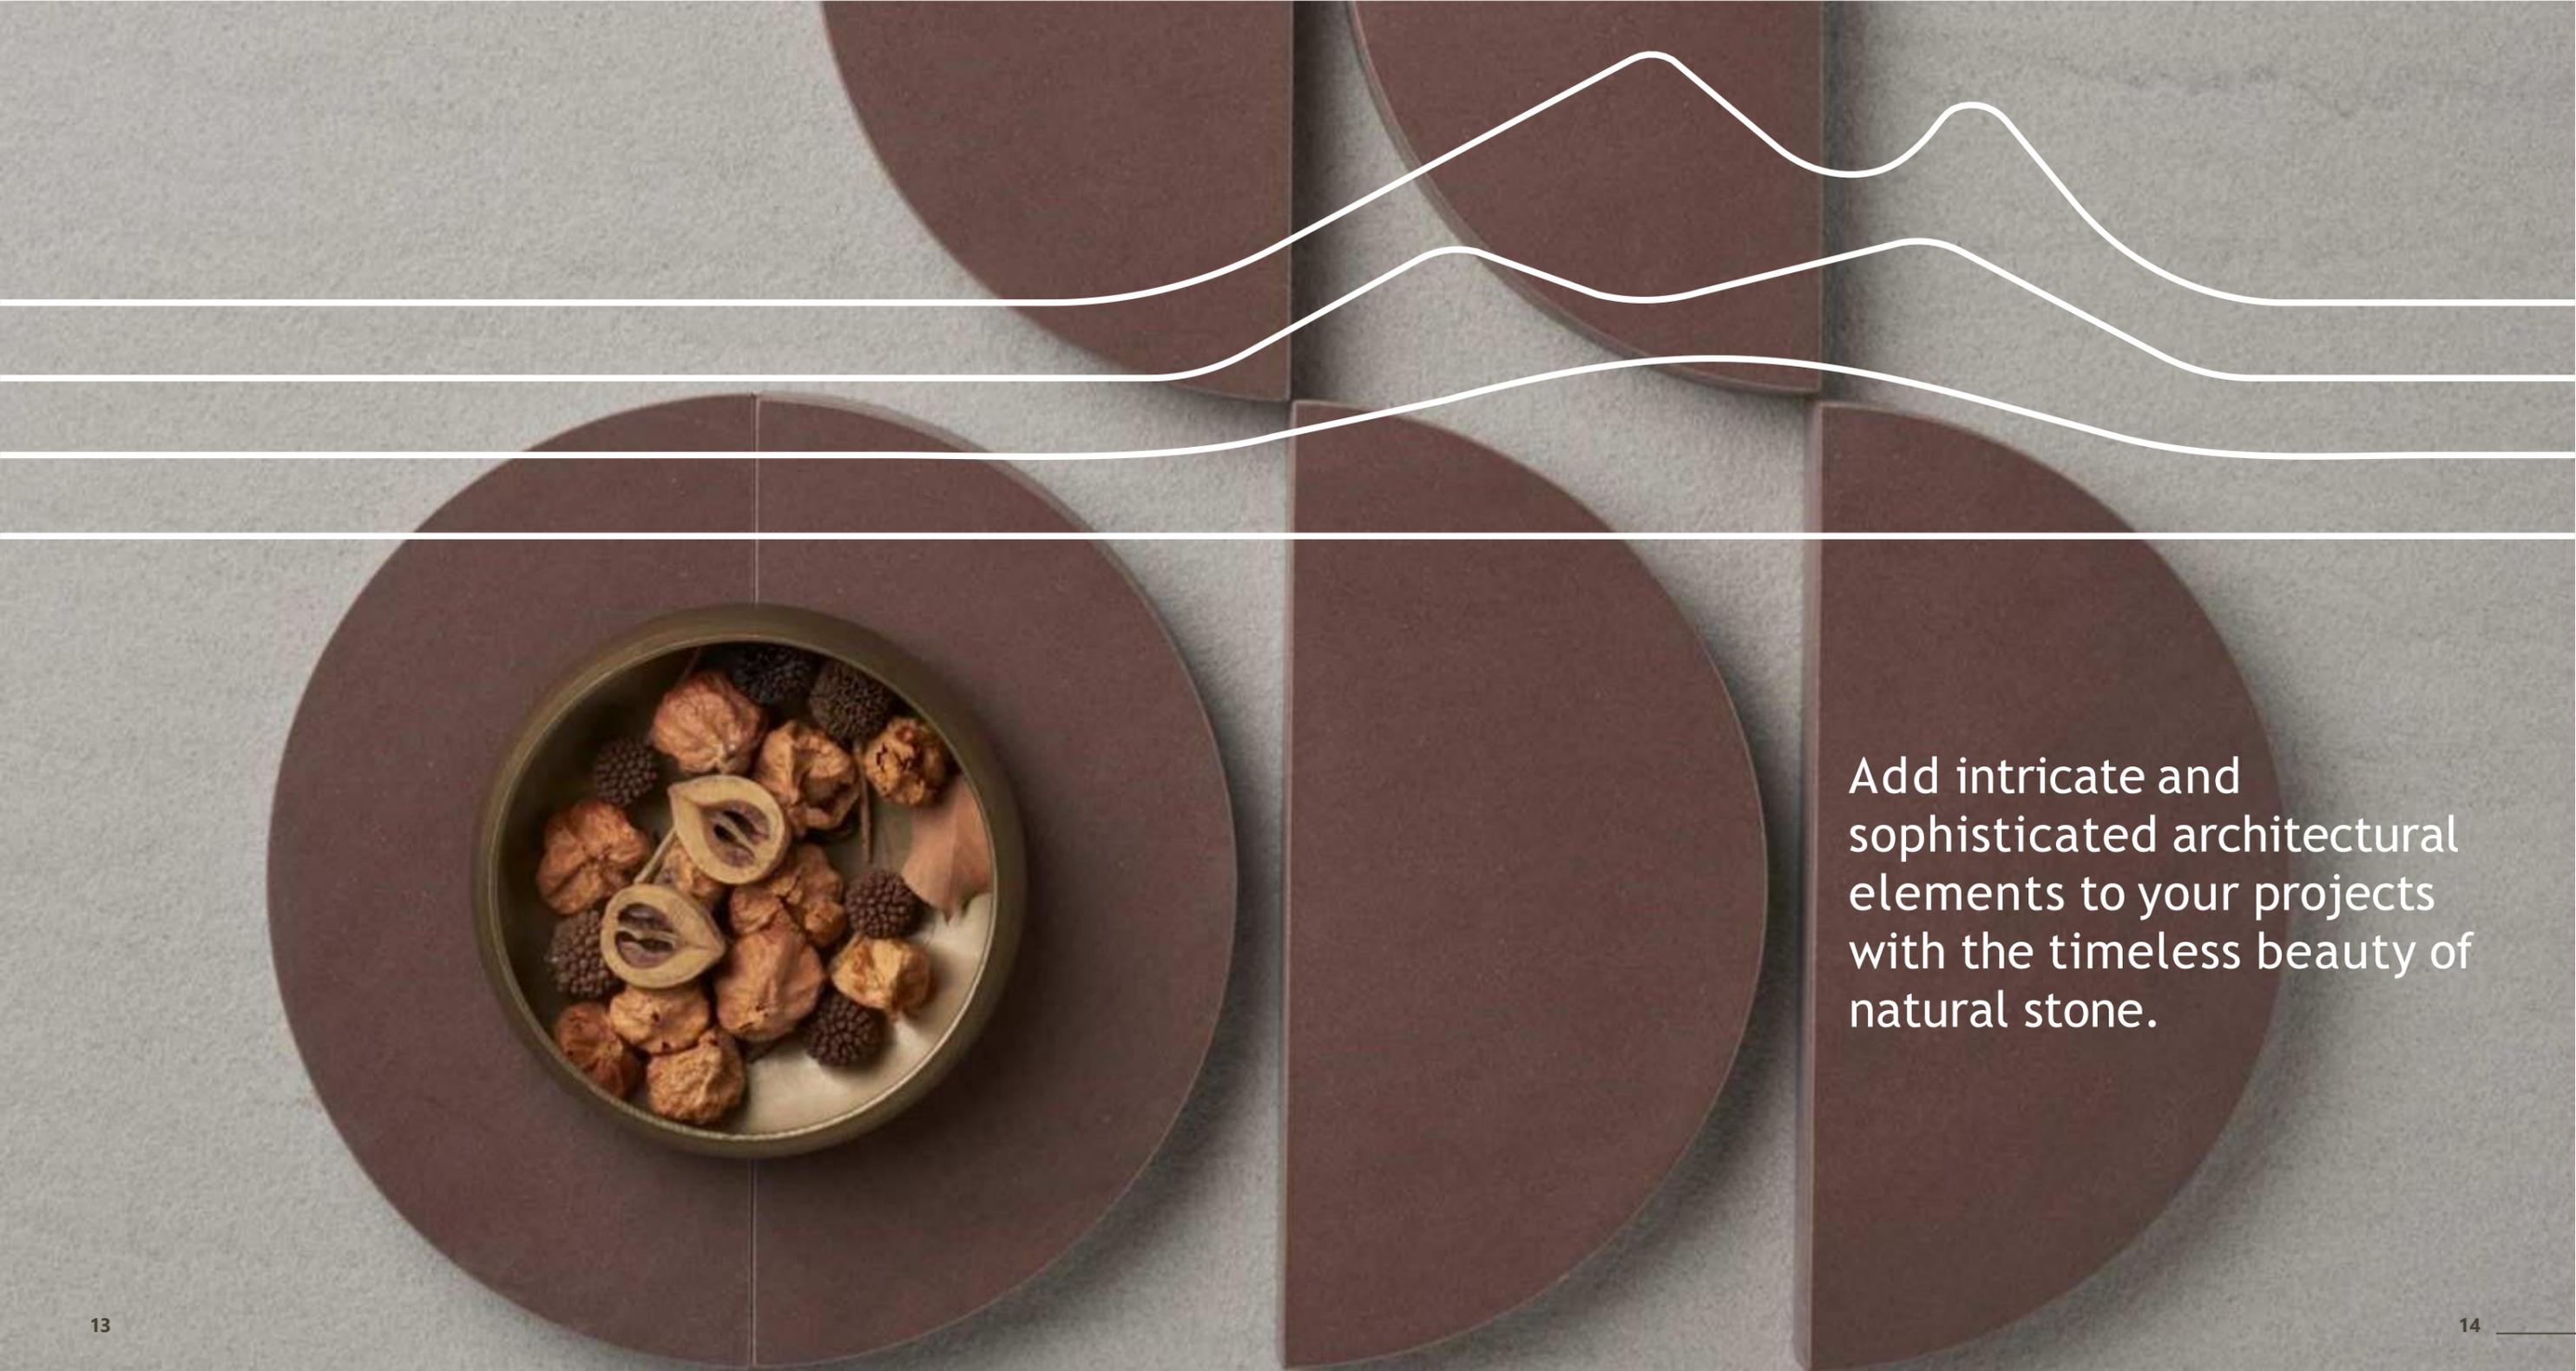

Capability of Interpreting Designs

After having contributed to a plethora of architectural possibilities all over the globe, we not only help you choose and deliver the right stone to the specifications of architects, but we also offer integral consulting for the right method of installation to facilitate end-to-end project and work execution. Detailed installation guidelines and best practices from all over the world are available for your perusal.

Unlock your Imagination

Add intricate and sophisticated architectural elements to your projects with the timeless beauty of natural stone.

Inventive ideas in natural stone can be showcased in a host of creative ways. We specialize in creating masterpieces, from start to finish, by using cutting-edge technology and our expertise in natural stone to bring your vision to reality. From custom sizes and shapes to unique finishes, the design possibilities are truly, endless.

Create an Inspired Lifestyle

Your creation is more than
just surface beauty. It is a
reflection of your identity

Inspired Living

Natural stone has the power to elevate any living space, adding a touch of timeless elegance and sophistication. We understand the transformative potential of this versatile material and strive to bring it to life in every project.

Our commitment to natural stone extends beyond aesthetics. We believe in harnessing the inherent durability and eco-friendliness of this ancient material to create living spaces that are not only beautiful, but also functional and sustainable. Let us help you create an environment that is both inspiring and livable, a reflection of your unique style and personality.

Timeless elegance for your living space, with natural stone

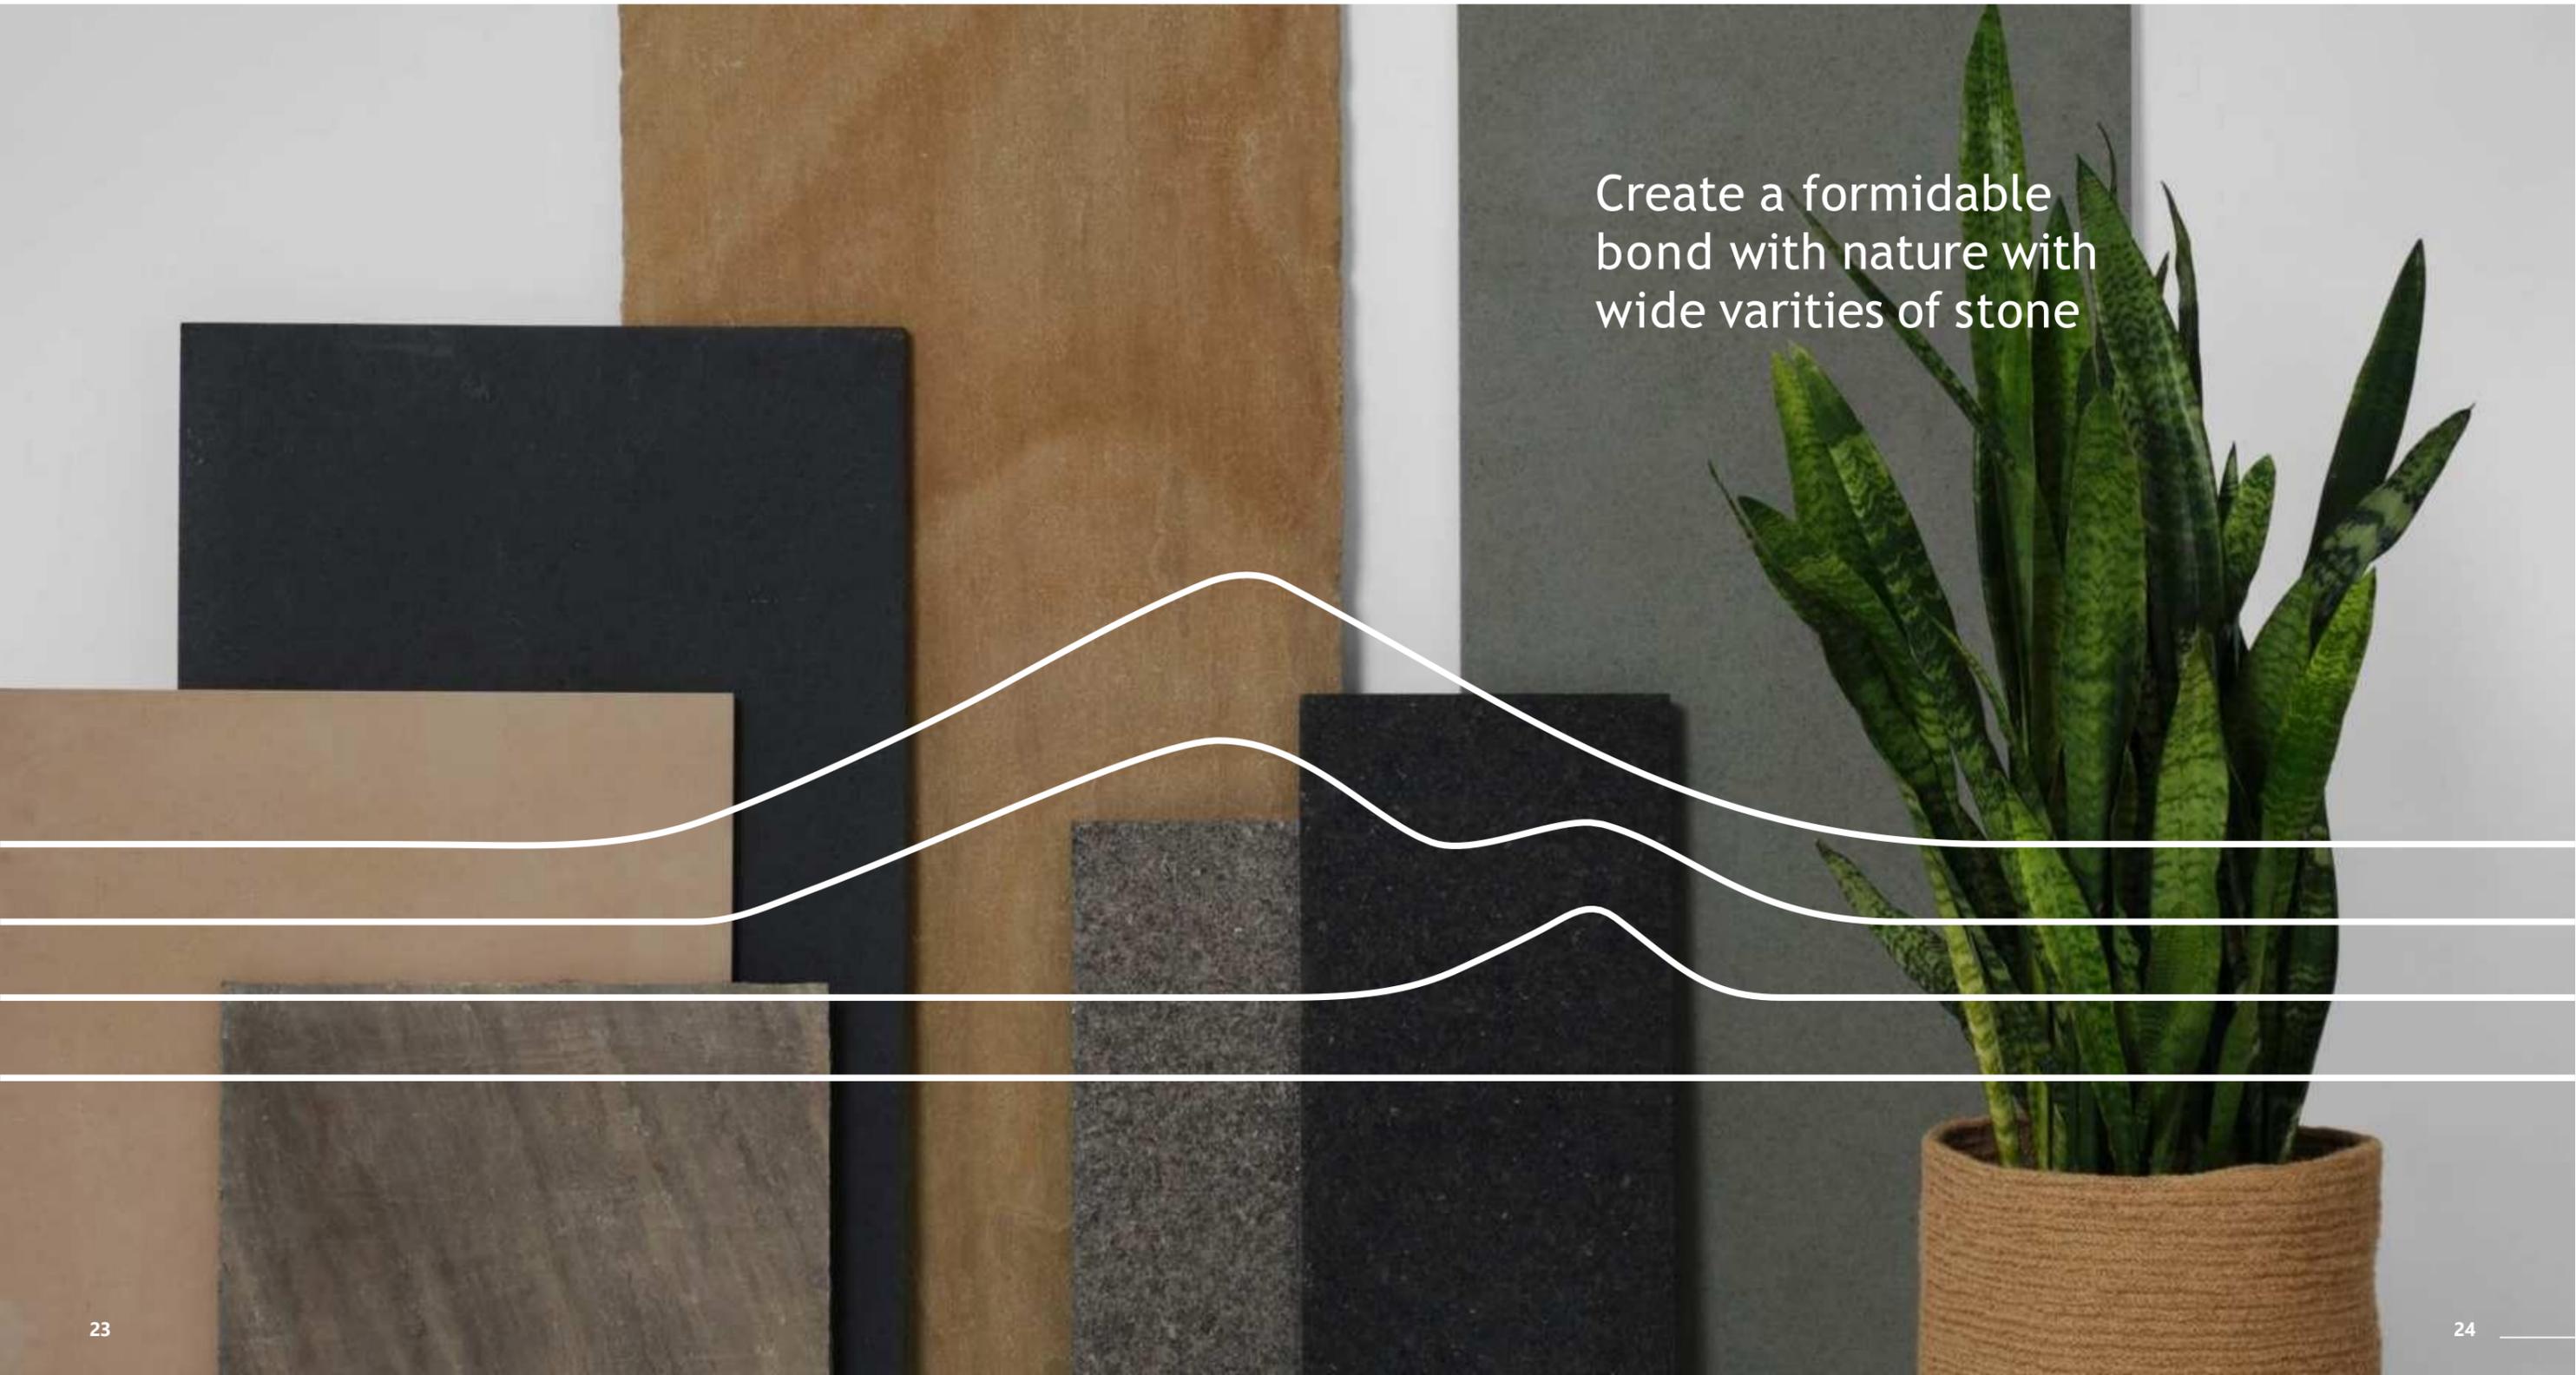

Experience the elegance and durability of natural stone as it seamlessly blends functionality and aesthetics to elevate your living space. Natural stone is the ultimate building material, known for its timeless appeal and ease of maintenance, making it the perfect choice for conscious and sophisticated living.

Understanding Stone

Create a formidable
bond with nature with
wide varieties of stone

Why Natural Stone

What is the allure of natural stone that captivates us?

Natural stone has an undeniable allure that has captivated designers for centuries. Perhaps it is the earthy, organic quality that draws us in, or the fact that each piece is unique and tells its own story. The natural variations and textures found in stone are a reflection of the geological activity that formed it, making it a truly one-of-a-kind material.

Beyond its aesthetic appeal, natural stone is also an eco-friendly choice. Quarried and processed with care, it is a sustainable building material that is not only durable and long-lasting, but also easy to maintain. It's a material that only improves with age, gaining character over time.

Natural stone has a timeless beauty that never goes out of style. It's a versatile material that can be used in a variety of ways, from flooring and countertops to walls and architectural features.

Hard-wearing | Energy efficient | Recyclable

Advantages of Natural Stone

Durable

Natural stone is renowned for its durability and long-lasting properties. The intense pressure and heat that natural stone is subjected to over millions of years during its formation, makes it one of the strongest and most durable building materials known to man. It can withstand the test of time and continue to look as beautiful as the day it was installed.

Versatile

Natural stone is a versatile building material that can be used in a wide range of applications, both indoors and outdoors. From driveways and paving to walling and coping, flooring and swimming pools, natural stone can be used to create beautiful and functional spaces. Its versatility also extends to special features such as signature walls and fireplaces, where it can add a touch of elegance and luxury.

Timeless

Natural stone is a material that has stood the test of time and continues to be a favorite among architects, designers, and homeowners alike. Its unique patterns and hues, shaped by the forces of nature, evoke a sense of history and permanence. Whether used in traditional or contemporary designs, natural stone adds a touch of class and sophistication that never goes out of style. It's a material that will continue to be valued for generations to come, making it the ultimate investment in timeless elegance.

Eco-Conscious

Natural stone is the epitome of eco-consciousness in the building and design world. Not only is it a recyclable and non-polluting material, but it also boasts a host of sustainable properties. Its natural thermal inertia helps conserve energy, making it a cost-effective long-term resource for any living space. And with its inherent durability and minimal maintenance needs, natural stone is a wise and lasting choice for any project.

Our Product Range

Nature's beauty, transformed for your space:
Explore our diverse range of natural stones

Limestone

*Creates compelling
versatility and elegance
to spaces*

Granite

*Design incredible home
accents and features*

Quartzite

*One of the strongest
natural stones on earth*

Quartzite

A natural stone with unique characteristics and unparalleled beauty, is the perfect choice for those seeking to add a touch of luxury to their living spaces. Its durable properties and resistance to wear and tear make it a practical choice for flooring, walling, countertops, or even for creating bespoke features. With its ability to withstand extreme temperatures and weather conditions, quartzite is also a great option for outdoor spaces.

Features

Composed primarily of sand-sized grains of quartz, cemented together with silica and other minerals.

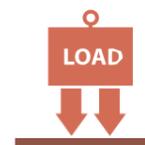

High density

Resistant to harsh weathering

Unique texture

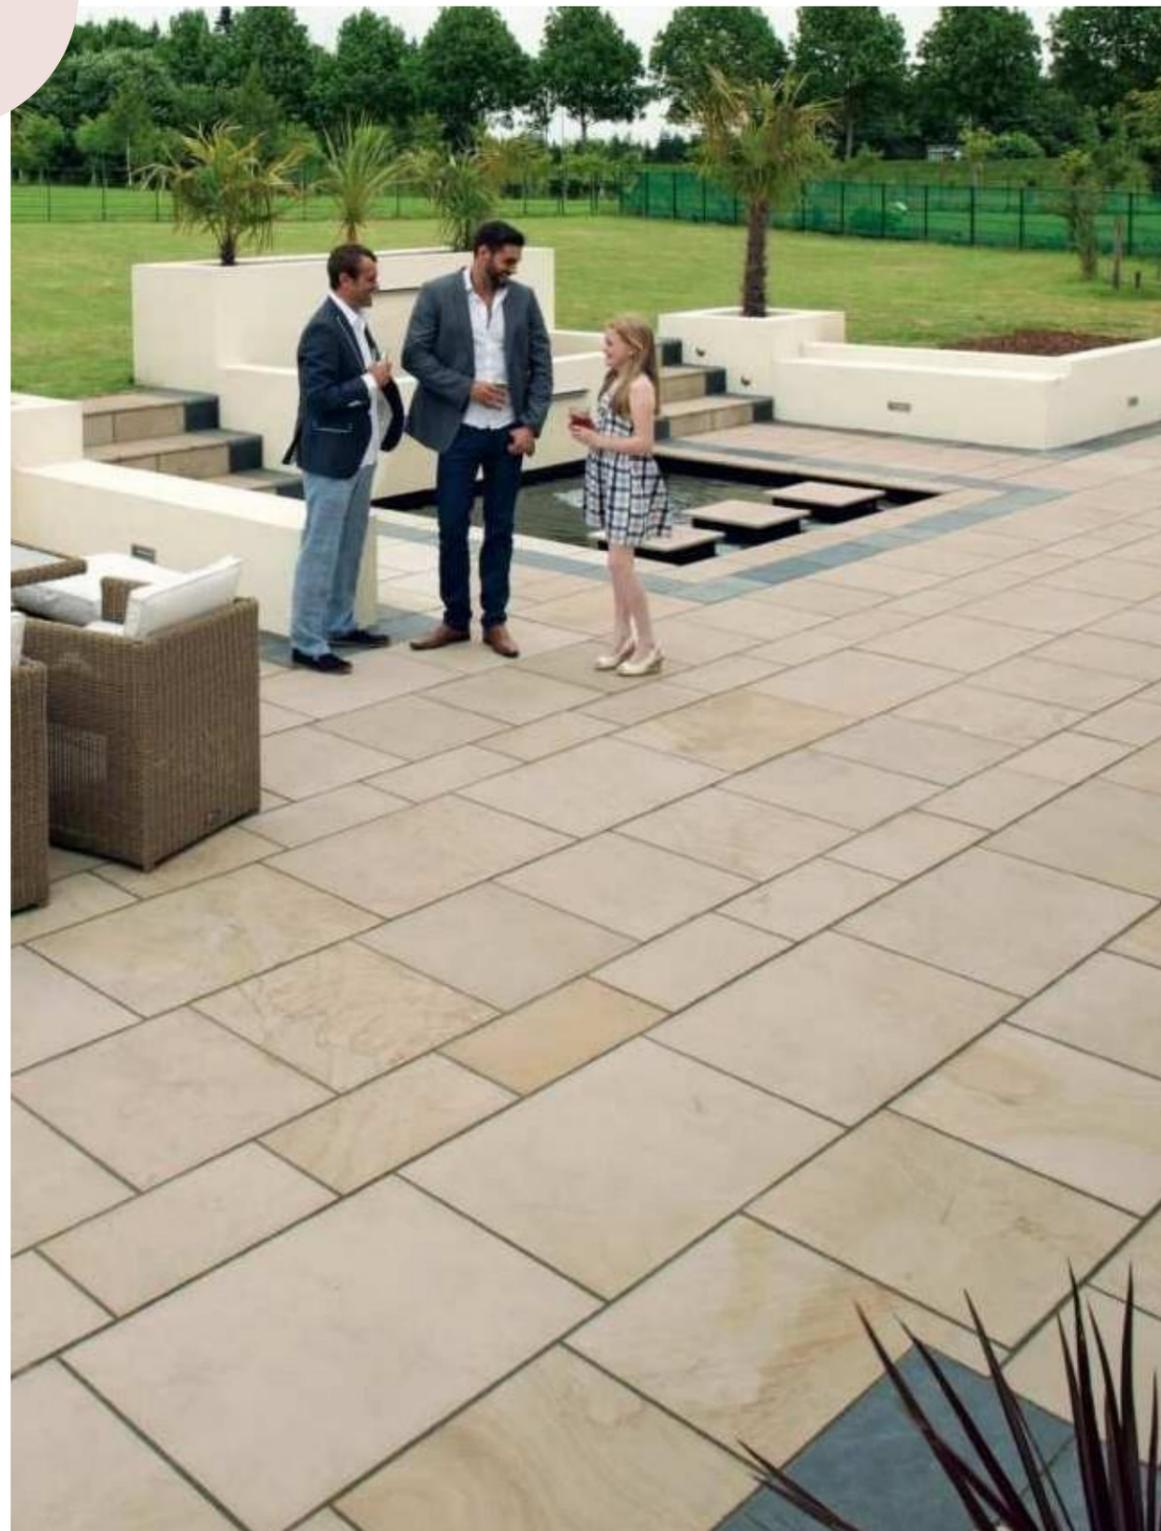

High compressive strength

Low porosity

Bring classic grace and style to living spaces

Usage of Quartzite

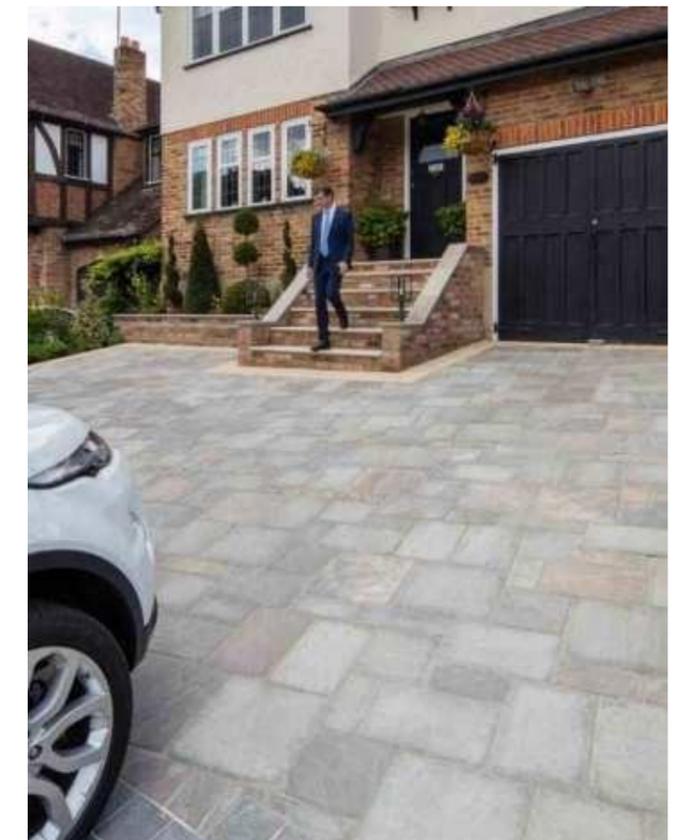

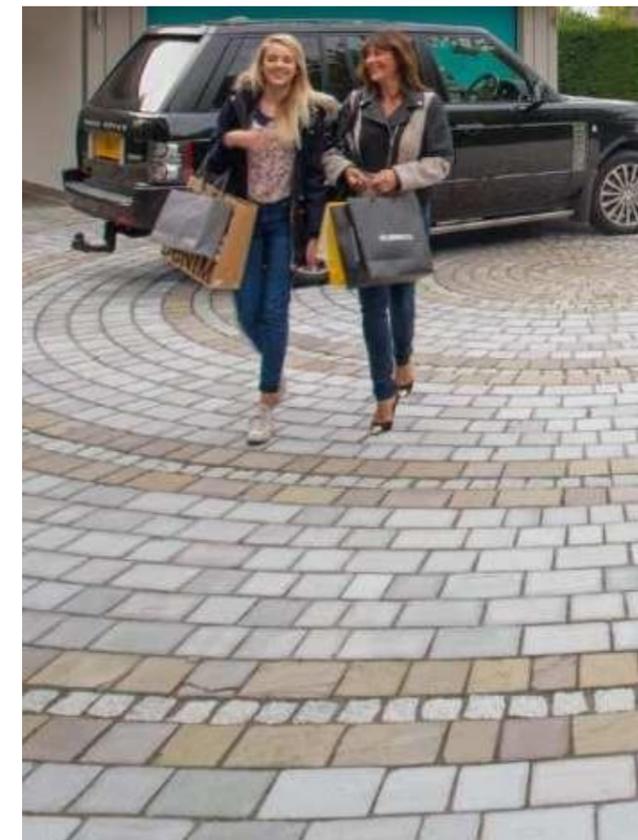

Quartzite's resilience and durability make it the perfect choice for hard landscaping projects such as driveways, patios, and garden paths.

Its natural beauty and strength also lend itself to unique architectural designs, such as cladding facades and walls, staircases, swimming pool edges, garden furniture, and ornamental carvings. This versatile stone is the ultimate choice for adding both function and aesthetic appeal to your outdoor spaces.

Gardens & Decks

Driveways & Pathways

Walling, Coping & Cladding

Swimming Pools

Colours of Quartzite

Quartzite is a natural stone that is treasured for its captivating array of hues and shades. The subtle hues of grey, the warm tones of brown, the striking contrasts of black and the fiery reds, all come together to create a palette that is both diverse and captivating. Each shade of quartzite has its own unique character, lending itself to a variety of design possibilities.

Celestia

Celestia boasts a timeless and sophisticated look with its neutral shades. The variations in this natural stone can range from light and airy greys to dark and moody shades, making it a versatile option for any design project.

Limestone

Limestone is a natural stone that evokes warmth and elegance, making it a popular choice for both residential and commercial projects. Its soft, neutral hues and subtle variations in colour and texture make it versatile and timeless. Formed over millions of years from the accumulation of shells, shells, coral and other marine life, limestone is known for its durability and resistance to weathering.

Features

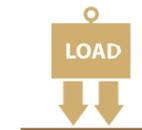

A sedimentary rock composed primarily of calcium carbonate, often in the form of the minerals calcite or aragonite.

High
density

Resistant
to harsh
weathering

High
compressive
strength

Low
porosity

Create compelling versatility and elegance

Usage of Limestone

The natural hues and textures of limestone make it a perfect fit for creating enchanting living spaces. Driveways, patios, and walkways, all come alive with the timeless elegance of limestone paving. It is an incredibly durable stone and able to withstand heavy foot traffic.

Carmena

A natural limestone of striking boldness, Carmena is the epitome of sophistication and elegance. Its dark, sleek appearance instils any space with depth and character, making it a highly sought-after choice for flooring, countertops, and other surfaces.

Carmena Natural

Carmena Antiqued

Suprema

Suprema Limestone, a natural stone of unparalleled versatility, is an immensely popular choice among builders and architects. Its ability to seamlessly integrate into both traditional and modern settings make it a perfect fit for any design style.

Suprema Natural

Suprema Antiqued

Canary

Canary is highly sought after for its warm, sunny hues that range from soft, buttery yellows to rich, golden tones. Its natural beauty is matched only by its exceptional durability and versatility, making it a favorite choice among architects and designers.

Canary Natural

Canary Antiqued

Granite

Significantly hard and durable, granite is an igneous rock formed by the solidification of magma deep below the earth's surface. Its unique composition of coarse-grained quartz and feldspars not only adds to its strength and durability, but also gives it a stunning range of colors. Its ability to withstand various weather conditions makes it a perfect choice for both indoor and outdoor construction projects. Granite tiles and slabs are often used as countertops, flooring and stair treads, providing an elegant and timeless touch to any space.

Features

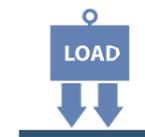

Granite is an igneous rock of breathtaking beauty, composed of the finest grains of quartz and feldspar

High density

Resistant to harsh weathering

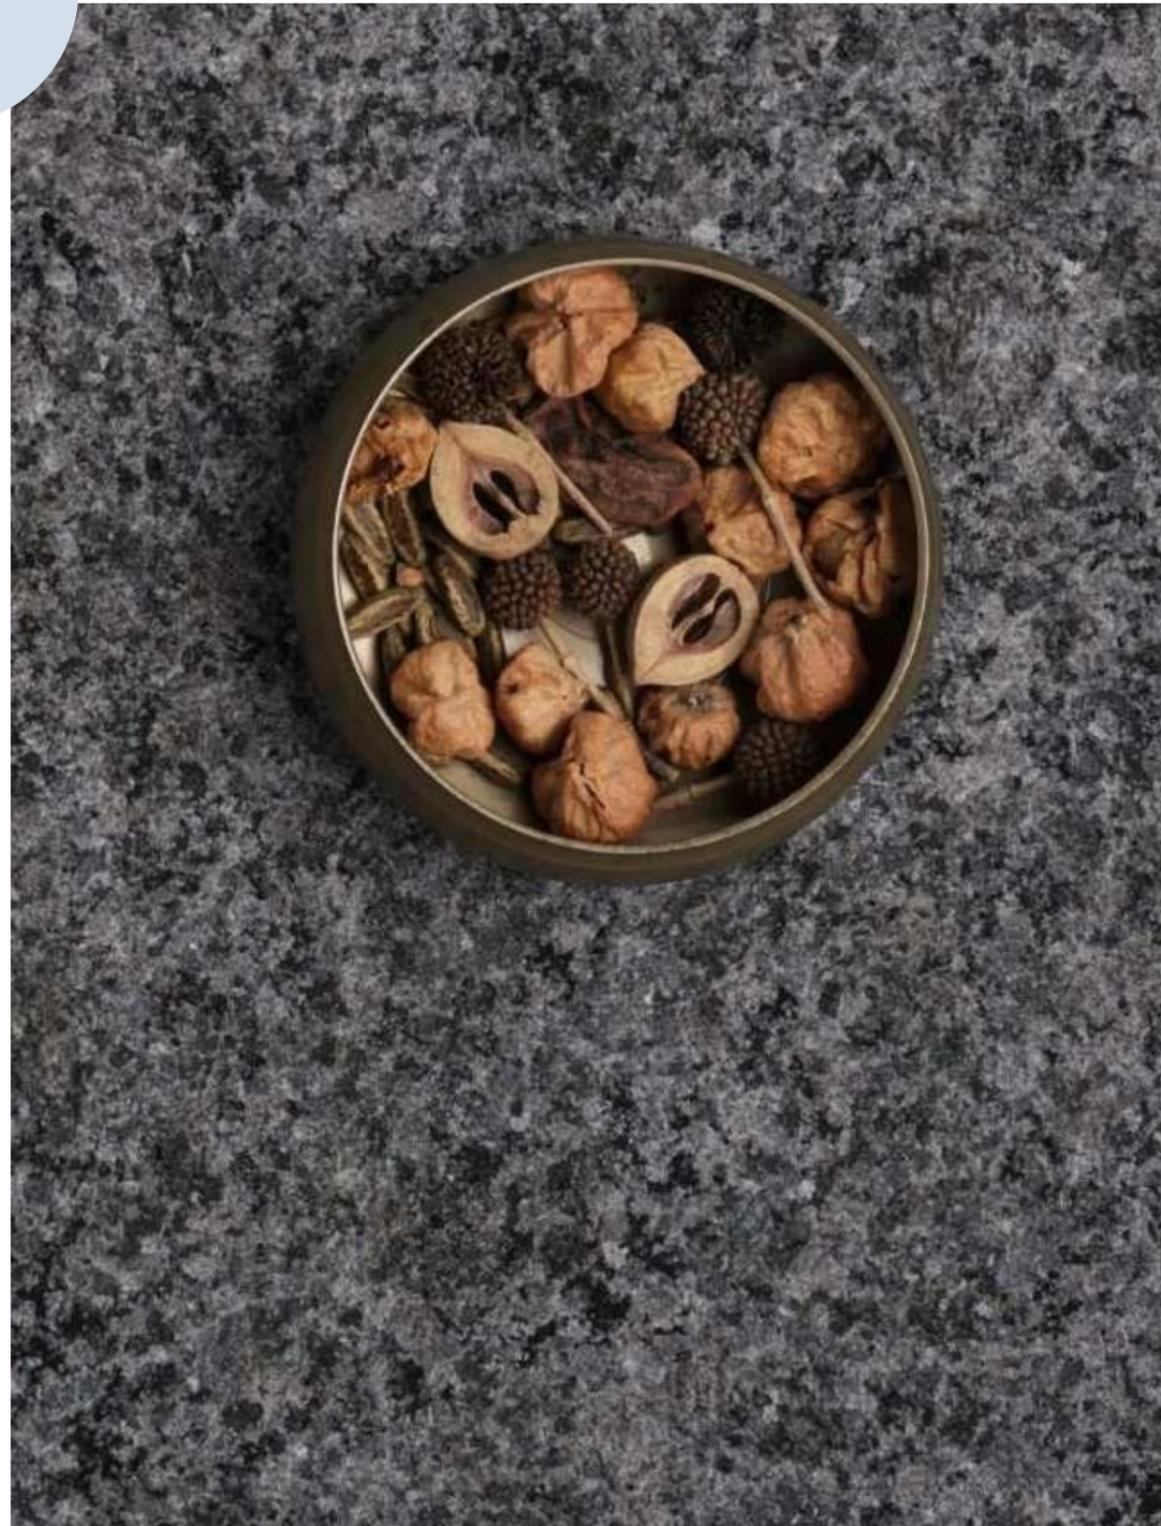

High compressive strength

Low porosity

Creates compelling home accents and features

Usage of Granite

Granite's durability and resistance to weather conditions make it an ideal choice for both indoor and outdoor applications. Its natural designs and hues are truly breathtaking, making it a popular choice among homeowners and designers alike.

View Our Bespoke Capabilities

In order to make a standout feature like a garden bench, sculpture, wash basin or fire pit, it is important to understand the design vision and detailing required.

We are passionate about transforming spaces with unique and iconic features. Our team of experts is dedicated to bringing your creative vision to life with the use of cutting-edge CNC-operated machines. The precision and accuracy of these machines, coupled with the latest technology, enable us to deliver flawless and intricate details. We pride ourselves on investing in state-of-the-art machinery and expert operators to provide bespoke solutions, tailored to the specific needs and specifications of our clients.

Pebble Seat
Stone Celestia

CNC Cell

Our CNC cell is equipped with an array of cutting-edge machines, designed to deliver with precision and accuracy at scale.

- 5 Axis Bridgesaw from Italy for cutting complex shape
- 5 Axis Wire profiler for executing difficult single piece profiles
- Water jet cutting machine for making screens and templates
- 3 Axis routers for etching, inlaying and making customized products
- Horizontal and Vertical Coring machines which allow us to make products lightweight while maintaining strength and durability.

Natural Stone for Bespoke Features

We are master artisans in the realm of natural stone, expertly shaping and sculpting each piece to perfection. Whether it be outdoor furniture, spheres, striking water features, fireplaces, window sills or any other bespoke creation, our team of experts has the skill and expertise to bring your vision to fruition. Natural stone, with its rich colors, textures, and patterns, is the perfect medium for exquisite designs and unique architectural features.

Natural stone, with its rich colors, textures, and patterns, is the perfect medium for exquisite designs and unique architectural features. From our vast selection of quartzite, limestone, granite, basalt, and schist, we can craft a signature look that will leave a lasting impression.

Colours & Finishes

Natural stone comes in a wide variety of colours, each with its own unique characteristics and finishes. The varying shades of gray and black found in granite, for example, can lend a sleek and modern look to stone furniture, while the warm tones of beige and cream found in sandstone can create a more classic and elegant feel.

The unique finishes on natural stone like honed, polished, bush hammered or flamed can add different texture and reflectivity to the stone surface. Each colour and finish can be used to create a specific aesthetic and can be incorporated into various design styles.

Creating Distinctive Public Spaces

Creating bespoke public spaces with natural stone is an artful endeavor that requires a keen understanding of design and a mastery of the material.

Using natural stone, we can create radial steps with inlays, tactile paving, and numerous custom cut sizes based on project specifications. These elements come together to create a cohesive and functional space that is both beautiful and functional. We can also create stone furniture that is both durable and visually striking.

Our Technical Expertise

Realizing your creative vision with cutting-edge technology

State-of-the-Art Equipment

- Jumbo block cutters for extremely large stone pavings
- Efficiency in cutting slabs with multi-block cutters
- Slicing of thick objects with mono-block cutters
- A range of premium finishing machines including flaming, water blasting, line polishing, antiquing and shot blasting
- Bridge saw machine for precise cutting of large slabs
- Premium CNC cell with Italian machines for crafting unique and intricate designs in natural stone.

Expansive Capacity

We are capable of producing an impressive 250,000 square meters of sawn paving and an astounding 3 million square meters of calibrated natural riven products. Our state-of-the-art machinery and expertly trained operators allow us to handle large-scale projects with ease, ensuring that every detail is executed to perfection. We take pride in our ability to meet the demands of even the most ambitious projects, and our capacity is a testament to our commitment to excellence in every aspect of our operations.

Our Contribution to Creating Grand Architectural Addresses is Not Limited to Supplying Stones.

— We are dedicated to bringing your architectural vision to life by expertly assessing the feasibility of a project and collaborating closely with you to identify and execute the most effective solutions.

— At the heart of our operations lies a commitment to excellence, ensuring that every step of the process - from sourcing the finest natural stone, to expertly hand-splitting or sawn cutting, and offering a wide array of finishes - is executed with the utmost care and attention to detail.

Infrastructure

We are dedicated to pushing the boundaries of innovation and excellence in natural stone manufacturing. By investing in state-of-the-art machinery and equipment, we are able to increase efficiency, expand our product offerings, and deliver projects of the highest quality on-time. Our commitment to staying ahead of the curve in technology allows us to support any design vision, whether it be from an architect or a home-owner. Our expertly trained team are equipped to handle these sophisticated technologies, ensuring that each project is executed with precision and care..

Quality Checks

For us, quality is of the utmost importance, and we take great care to ensure that every slab of natural stone we produce meets the highest standards.. Our process begins at the quarry, where we carefully inspect each stone block based on project specifications. Our experienced team has a keen eye for identifying the most appropriate blocks, and we use sophisticated mining techniques to extract the stone. Once the stone has been extracted, we employ precise cutting methods to ensure that each slab meets the project's specifications. At every step of the process, our team conducts thorough quality inspections to ensure that our products are of the highest caliber..

Safety Measures

A safe work environment at the quarries and factories is top priority. We take a proactive approach to identifying and mitigating workplace hazards, ensuring a safe and healthy environment for our employees. This includes implementing comprehensive safety programs, providing training and personal protective equipment, reporting and addressing unsafe incidents, and equipping the shop floor with vacuum lifting equipment.

Signages on the shop floor

Certifications

Our commitment to excellence is reflected in the various global certifications we have earned, which attest to the quality of our stones and the training of our personnel, as well as our environmental performance

- ___ Quality Management System ISO 9001:2015
- ___ Safety Management System ISO 45001:2018
- ___ Environment Management System ISO 14001
- ___ ISO 9001: 2000 - Certified with LRQA
- ___ ISO 9001: 2008 - Certified with AIB Vincotte International Ltd.
- ___ ISO 9001: 2015 - Certified with TUV SUD South Asia Pvt. Ltd.
- ___ ISO 14001: 2015 - Certified with TUV SUD South Asia Pvt. Ltd.
- ___ ISO 45001:2015 - Certified with TUV SUD South Asia Pvt. Ltd.

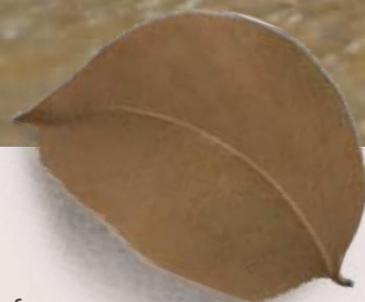

Cutting

We prioritize precision and attention to detail in our cutting process for both hand-split and sawn natural stone products. Our primary cutting stage uses jumbo or multi blade block cutters for rough slicing, followed by secondary cutting with more precise machinery like laser guided bridge saws and CNC wires or saws for intricate designs and perfectly sized pieces.

Finishing

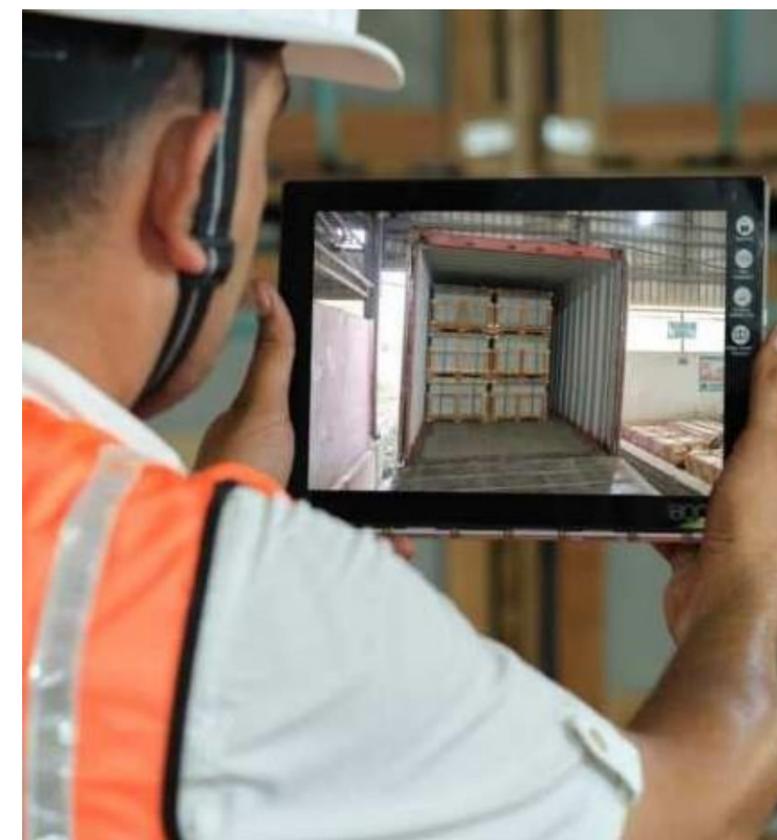

The art of finishing is a crucial part of the production process, as it allows for the transformation of raw stone slabs into beautiful, functional works of art. By offering a diverse selection of finishes from blasting to flaming, clear blasting to bushhammering, we are able to cater to the unique needs and preferences of our clients, ensuring that each product meets their exacting standards.

Packaging

We take great care in packaging our products to ensure they are protected during shipping and arrive in good condition.

Our commitment to sustainability is highlighted by our use of heat treatment chambers to fumigate crates instead of harmful methyl bromide. We also minimize our environmental impact by reducing the use of styrofoam and wood in our packing and optimizing our crate design.

Production Updates

We understand the importance of keeping our customers informed about the progress of their orders. We are dedicated to providing a high level of transparency and service, and have implemented a thorough reporting system to ensure that they are always in the loop.

For bespoke projects, we dry lay all the finished product, allowing customers to visualize how the final project will look and create a detailed inspection report.

Care and Maintenance

Preserve the beauty of natural stone with simple, regular care

Maintaining the beauty of natural stone is a very easy process. To clean, simply wipe down the surface with a damp cloth and mild detergent. Avoid using any acidic or abrasive cleaning products as they can damage the stone.

Dusting on a regular basis is also important to keep the natural stone clean. With these simple care steps, your natural stone can continue to add elegance to your space for years to come.

Tips

Sweep away dirt and detritus regularly

Pull out weeds from outdoor paving

Use a mild household detergent to clean spots

Use a stiff brush to remove hard particles

Use PH neutral cleansers
